ARTS CLUB

The students develop and organize own clubs and have the opportunity to demonstrate and develop their leadership and decision making skills. The clubs provide a learning experience for the members as students are responsible for the organizing, funding, public relations, regulating, and scheduling activities for the event with the help of faculty.

CLUB INAUGURATION

The Science Club was started with an aim intended to invite many eminent scientists who would share their experience with the students and motivate them to get scientific knowledge. Activities are designed primarily to introduce students to undertake interesting/exciting science and technology projects. The Science Club consists of a group of students who want to explore more in the world of science. The club is open to all students. The purpose of the Science Club is to promote interest, understanding, and knowledge of the scientific world amongst the college students and local community.

Mentor mentee Meeting

A mentor & mentee relationship is one of the most important things to have in your professional career. Both the mentee and mentor can learn from the experience, as it promotes the transfer of skills and knowledge between the two. The mentee typically gains valuable insight into an industry while the mentor revisits skill sets, potentially encouraging them to look at their approach and techniques in a different way
